DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follow:

I) Species A of figures 1-5C; readable to claims 1-5

II) Species B of figures 6-8; readable to claims 6-9

2. The species listed above do not related to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species A, directed to a magnetic bearing structure with fins mounted on rotary shaft with a vortex tube mounted on one end of the structure while Species B directed to a magnetic bearing structure with fins mounted on axial magnetic disc with a vortex tube integrally formed with the structure as a single unit.

3. A telephone call was made to the Attorney of record on 5/25/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is required to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that there is no generic claim.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
